Dampening Roller Printing with Alcohol

Compound	Shore A
119	25
219	30
319	35
419	40

- Form dampening roller for conventional inks
- Water pan / metering roller
- For use with standard IPA level

Application

- Good and even dampening properties for printing with alcohol (IPA)
- Good resistance to conventional printing inks
- High ageing resistance

Features

- OEM compound with prominent press manufacturers
- Compound 147 25 is recommended as water pan roller and compound 124 25 as form dampening roller in case of IPA reduced printing
- Compound 134 25 is recommended as form dampening roller in case of UV printing

Note

- Reduced ink feed-back
- Stable dampening
- Great dampening range
- Reduced waste paper on print start
- Stable print process

Benefits
