

# Sheetfed Offset

Compound Shore A  
124 25

## Form Dampening Roller Alcohol-Reduced and Alcohol-Free Printing

- Form dampening roller for conventional inks
- IPA-reduced and IPA-free printing

*Application*

- Very good and even dampening properties with IPA-reduced and IPA-free printing
- Supports ink/water-emulsifying
- High Resistance to fountain solutions for alcohol- reduced printing

*Features*

- OEM roller compound with prominent press manufacturers
- Compound 124 25 is not to be used together with UV inks or hybrid inks.
- We recommend compound 124 25 in combination with compound 147 25 as water pan/metering roller

*Note*

- Reduced ink feed-back
- Very stable dampening
- Great dampening range also in case of IPA-free printing
- Reduced waste paper on print start
- Stable print process

*Benefits*
