## Water Pan / Metering Roller Alcohol-Reduced and Alcohol-Free Printing

 Water pan / metering roller

*Application*

-  Very good and even dampening properties with IPA- reduced and IPA-free printing
-  High dip volume
-  High resistance to fountain solution additives for alcohol- reduced printing
-  Can be used for printing with conventional and UV inks

*Features*

-  OEM compound with prominent press manufacturers
-  In case of conventional printing, compound 124 25 is recommended as form dampening roller
-  In case of UV printing or mixed mode printing, compound 134 25 is recommended as form dampening roller.

*Note*

-  Extremely reduced ink feed-back
-  Reduced cleaning expenditure
-  Very stable dampening
-  Great dampening range also with IPA-free printing
-  Reduced waste paper on print start
-  Stable print process
-  High geometrical stability

*Benefits*
