

Böttcherin 80-F

Cleaning Agent for Rollers and Blankets

Particularly suitable for automatic washing systems in newspaper presses, specifically designed for use in filtration systems.

Böttcherin 80-F is developed for recycling after having passed a filtration unit. For this reason, a particular medium ensures that the emulsion from water and Böttcherin 80-F will totally separate after short time.

Application

-
-  based on aliphatic hydrocarbons
 -  flash point > 80 °C
 -  short time water miscible, free of aromatics, corrosion inhibited
 -  increased cleaning effect
 -  designed for use in filtration units, effective particularly in newspaper printing
 -  slow evaporation and high cleaning performance
 -  environmentally friendly

Features

Do not contaminate with white spirit or other washes or press room chemicals, if using in filtration systems. Use pre-filtering of return waste if excessive paper dust present. For effective filtration, ensure minimum environment temperature is above 20 °C.

Regularly clean the circulation systems to reduce algae build up. Use BöttcherPro Calcit as a re-hardener for RO and soft water.

Note

Böttcherin 80-F is approved by the manufacturers Heidelberg, manroland, Koenig & Bauer, Oxy-Dry, WIFAG, Technotrans and Betz for use in their machines.

-  20 liter can
-  200 liter drum
-  1000 liter container

Package

Böttcherin 80-F is classified and marked in accordance with EC - Directive 1999/45/EC - in its latest version. Böttcherin 80-F is not a dangerous good in the sense of national and international transport regulations.
