BöttcherPro Antifoam

De-Foamer for Fountain Solutions

As a fountain solution additive, used to reduce excessive foaming in fountain circulation systems.

Application

- reduces foaming effectively
- low concentrations used
- does not influence printed result, if applied as recommended
- emulsifies with water

Features

Add 5 to 10 ml of BöttcherPro Antifoam to the fountain circulation tank with the press running at crawl speed. Wait 5 minutes to let foam decay. Use repeatedly, if necessary.

Caution: Add in small amounts only.

Note

🔵 1 litre bottle

BöttcherPro Antifoam is classified and marked in accordance with EC-Directive 1999/45/EC - in its latest version. BöttcherPro Antifoam is not a dangerous good in the sense of national and international transport regulations.
