

BöttcherPro Cleanfix-UV

Roller cleaner for UV printing

Cleaning gel for ink rollers in UV printing.

-
- 🌍 flash point > 100 °C, water miscible
 - 🌍 good cleaning performance, even for removing calcium build-up and paper lint residue
 - 🌍 restores the original surface roughness and ink pick-up of the rollers
 - 🌍 easy application by bottle
 - 🌍 regular application (once weekly) prevents calcium build-up on ink rollers
 - 🌍 prolongs roller life
 - 🌍 compatible with ink rollers for UV printing (EPDM)
 - 🌍 also for use with hybrid and conventional compounds as well
-

After washing with a Böttcher UV roller wash, e.g. Böttcherin Offset-UV XL or Böttcherin UV-60 S apply BöttcherPro Cleanfix-UV easily from the bottle onto the rollers, with the rollers rotating slowly. After 3-5 minutes, the ink will have been dissolved and the rollers can be washed down with water and/or a UV wash. Suitable for both manual cleaning and automatic washing systems.

When dealing with particularly stubborn residue, extend the period the gel is left on the rollers, even leaving it on overnight.

-  0.5 kg plastic bottle
-  6 bottles in a cardboard box

Package

BöttcherProCleanfix-UV is classified and marked in accordance with Regulation (EC) No 1272/2008 (CLP Regulation) in its latest version and is not classed as a dangerous material in the sense of national and international transport regulations.
