

# BöttcherPro Calciumfix

## Decalcifying Gel

Cleaning paste which removes stubborn calcium contamination on ink rollers.  
BöttcherPro Calciumfix solves glazing, which results from paper lint residues, as well.

*Application*

- based on solvents, acids and auxiliaries
- flash point > 100 °C
- water miscible, free of aromatics and CFC's
- good cleaning performance for removing calcium contamination and paper lint residues
- restores the original roughness and colour pick-up of the rollers
- easy application by tube
- regular application (once weekly) prevents calcium built-up on ink rollers
- prolongs roller life
- may also be applied to ink rollers for UV-printing (EPDM)
- dissolves dried UV ink from inking rollers

*Features*

After washing with a Böttcher roller wash, apply BöttcherPro Calciumfix easily from the tube on the roller, with the roller running slowly. The dissolving process will be completed after 3 to 5 minutes, then the roller should be washed with water and/or cleaning agent. For manual use or for use in automatic washing devices. Repeat as necessary.

*Note*

- 0.5 kg tube
- 6 tubes per carton

Package

BöttcherPro Calciumfix is classified and marked in accordance with EC-Directive 1999/45/EC – in its latest version. BöttcherPro Calciumfix is not a dangerous good in the sense of national and international transport regulations.
