

Böttcher-ink fountain liner

The Böttcher-ink fountain liner fits exactly in the CPC-ink dosage system of the Heidelberg press.

This special polyester sheet substitutes the ink meter of the duktrol roller.

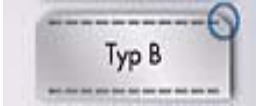

It is folded and cut exactly and therefore easy to install. The ink zones can be regulated accurately during the printing process.

Application

The following formats are currently available (100 sheets per box):

	type of machine	foil thickness	code
	HD Quickmaster 46, Typ A	190 micron	801802
	HD GTO 52 / SM 52, Typ A	190 micron	801803
	HD M-Offset, Typ A	190 micron	801804
	HD SM 72 / SM 74, Typ A	190 micron	801805
	HD SM 102, Typ A	190 micron	801806
	HD SM 72 / SM 74, Typ A	250 micron (for UV)	801989
	HD SM 102, Typ A	250 micron (for UV)	801990

Formats

 <i>cut corner</i>	type of machine	foil thickness	code
	HD SM 52, Typ B	190 micron	801830
	HD CD 74 / SM 74 / XL 75, Typ B	190 micron	801831
	HD CD 102 / XL 105 / XL 106, Typ B	190 micron	801832
