

# Rotogravure

## ESA Impression Rollers

### Illustration Printing

Compound	Shore A
641	90
621	90
652	90

- Impression rollers for printing with electrostatic printing assistance (ESA)
- Indirect charging, short or standard ESA emission electrode (641 90)
- Direct charging, ESA side charging systems (621 90)
- Direct charging, ESA core charging systems (652 90)

*Application*

- Coverings for all common charging systems
- Excellent dynamic properties
- Constant electrical properties
- Precise geometry

*Features*

- Production of Nipco impression roller sleeves
- Grinding service

*Note*

- Less heat build-up even at high print speed
- Stable printing process
- Excellent operating characteristics
- Long service life

*Benefits*
