

VitaClean R

Intensive Cleaning Agent

For intensive cleaning of ink rollers and blankets at quick colour changes. It is suitable for both manual cleaning and use in automatic ink roller washing systems. Can also be used as general purpose pressroom cleaner for cleaning press side frames, platforms, cabinets and path rollers. Applicable especially in food packaging printing.

Application

- liquid, highly effective alkaline intensive cleaning agent
- water miscible, free of aromatics and CFC's
- deep-down cleaning of roller and blanket surfaces
- removes encrusted inks and other dirt also suitable for removing UV and hybrid inks
- prevents glazing and polishing of the roller surfaces, if used regularly
- economic use
- compatibility with rollers for UV printing and dual purpose printing
- may attack plates - spot checks required

Features

Manual roller cleaning

After a short pre-wash with a Böttcher roller wash, apply VitaClean R to the rollers and leave to take effect for several minutes, with the printing machine running at idle speed. Rinse with the same Böttcher roller wash used for pre-washing or with water. In stubborn cases, leave VitaClean R to take effect for a longer time.

Automatic roller cleaning

After the standard wash program for roller cleaning, start the program for colour change. Wear protective gloves and approved personal eye protection during application. VitaClean R is approved by the manufacturer MAN as intensive cleaner for use in their ink roller washing systems.

It is certificated by ISEGA, intended use provided, VitaClean R is therefore appropriate for the application in the food packaging printing.

Note

-  1 litre bottle
-  20 litre can

Package

VitaClean R is classified and marked in accordance with EC-Directive 1999/45/EC - in its latest version. VitaClean R is not a dangerous good in the sense of the national and international transport regulations.
