VitaWash-UV

Wash for Roller and Blankets in UV

Application

It is suitable for both manual cleaning and use in automatic washing systems to remove UV inks. Applicable especially in food packaging printing.

Features

- flash point > 80 °C
- completely water miscible, free of aromatics, corrosion inhibited
- high wash quality
- slow evaporation
- good chemical compatibility with UV resistant rubber rollers and blankets
- not suitable for conventional roller qualities
- may attack non baked positive plates

Note

We recommend setting the washing system to optimise the cleaning cycle and VitaWash-UV performance. In case of manual cleaning, use VitaWash-UV undiluted. Apply the wash to the blanket or roller, then finally rinse with water until all ink and cleaning agent residues have been removed.

Follow the automatic washing system manufacturers' operating instructions. If manual cleaning with a hand rag, wear protective gloves during application, follow all press safety instructions.

VitaWash-UV is approved by the manufacturers Heidelberg and manroland for use in their machines. It is certificated by ISEGA, intended use provided, VitaWash-UV is therefore appropriate for the application in the food packaging printing.
