Overvarnish Applicator

Compound Shore A

951 55

Overvarnishing of 2-piece beverage cans

APPLICATION

Printing machines **2-Piece Beverage Can**
OV Applicators from all Manufacturers

Substrates **2-Piece Aluminium Cans**

Media **All 2-Piece Overvarnish Coatings**

ADDED VALUE

Productivity:

- Böttcher Overvarnish Applicators have a longer service life due to their resistance to swelling and cutting
- Quick-change sleeve system, effortless to change

Quality:

- extremely low swell rates and excellent dynamic properties mean that the applicators retain their dimensional stability so that the nip pressure remains constant and even across the width of the inker

Sustainability:

- Fewer Overvarnish Applicator changes and fewer deliveries thanks to longer service life and quick-change sleeve system

PROPERTIES

- The Magicoat OV series offers you high-end polyurethane materials with very good swelling and cut resistance, outstanding edge stability and maximum chemical resistance.
- Mechanically adapted to the operating conditions of the machine
- The result is higher quality and a longer service life of the coating wheels
