## BöttcherPro AR

### Special Cleaner for Rollers and Printing Blankets

#### APPLICATION

**Printing Machines** for fast colour changes

**Inks** Removes conventional inks

**Processes** Both manual cleaning and use in automatic washing systems

#### CUSTOMER VALUE

##### Productivity:

- High efficiency, reduced cleaning agent consumption.

##### Quality:

- Liquid, highly effective alkaline cleaner.
- Deep pore cleaning of roller and blanket surfaces.
- Removes dried ink residues and other contaminants.

##### Sustainability:

- Free of aromatics.
- Water-soluble.
- Free of chlorinated hydrocarbons (CKW).

#### FEATURES

- Compatible with rollers used for pure UV inks and UV switching prints.
- Suitable for cleaning metal surfaces, corrugated floor plates, and sidewalls of the printing machine.
- Can also be used on guide rollers.
- Suitable for cleaning UV and hybrid inks.
- Regular use prevents glazing of rollers and printing blankets.

## TECHNISCHE DATEN

<b>Form:</b>	<b>Liquid</b>
<b>Color:</b>	<b>Colorless</b>
<b>Flash Point:</b>	<b>103°C</b>
<b>Density:</b>	<b>1.02 g/cm<sup>3</sup> at 20°C</b>
<b>Water Solubility:</b>	<b>Soluble</b>

## MACHINE DATA

Compatible with all washing system types.

## PACKAGING

1 L bottle, 20 L drum.

## NOTES

### Manual Roller Cleaning:

After a short pre-wash with a Böttcher roller washing agent, simply apply BöttcherPro AR to the rollers and let it act for a few minutes while the machine runs idle. Then rinse with the same Böttcher roller washing agent or water. For stubborn contamination, let BöttcherPro AR act longer.

### Automatic Roller Cleaning:

After the normal washing program for roller cleaning, start the program for color change. Appropriate protective gloves and goggles must be worn during application. BöttcherPro AR is listed as a special cleaning agent for use in the color roller washing unit of manroland.

**Caution:** Can attack printing plates.
