BöttcherTex Ultima

Cleaning Web for Automatic Blanket Wash Systems

APPLICATION

Suitable for use in blanket wash systems from all manufacturers.

ADDED VALUE

Productivity:

- Reduced roll changes due to longer run lengths on mini rolls.
- Fast and effective cleaning thanks to high absorbency, allowing for full cleaning agent retention.
- No need for additional cleaning of residual dirt due to consistent cleaning across the entire width of the rubber blanket.

Quality:

- Ensures consistently high print quality after cleaning.
- Listed on Koenig & Bauer's approved list (Point 2.2 Approved Wash Cloths).

Sustainability:

- The product contains no binders/adhesives due to its water jet manufacturing technology.

FEATURES

- Optimized fiber arrangement ensures optimal liquid distribution, both longitudinally and transversely.
- High run length due to improved calendaring of the fleece material.
- Thanks to the particularly long-fibered cellulose material, the fleece leaves almost no fiber residues on the printing blanket.
- High absorbency, good capillary action, and good solvent resistance.

TECHNICAL DATA

Colour:	Turquoise
Composition:	55% cellulose + 45% polyester fibers
Weight:	70 g/m²
Tensile Strength (longitudinal):	140 N (10 cm x 5 cm)
Tensile Strength (transverse):	72 N (10 cm x 5 cm)
Elongation (longitudinal):	31% (10 cm x 15 cm)
Elongation (transverse):	86% (10 cm x 15 cm)
Thickness:	0.24 mm

NOTES

Available as:

Mini rolls for direct use in automatic wash systems.

Maxi rolls (length 500 m) for self-conversion to mini rolls with our winding stand.
