

Boost your Production

Plastic film

Compound Shore A

935 75

Extrusion, winding, processing

Application

Take-off roller for blown film extrusion
Contact roller film winder
Embossing counter roller PE

Customer Value

Productivity:

- Reduced number of roll changes due to outstanding dimensional stability and high resistance to entry marks from material web edges
- Reduced number of roller changes due to high cutting resistance and reduced opening of cutting injuries
- Reduced production stops through improved material release due to reduced static charges

Quality:

- Constant product quality through constant flatness over the entire life cycle
- Constant winding quality thanks to outstanding dimensional stability due to excellent wear resistance
- Avoidance of electrostatic charges in the film wrap due to antistatic properties

Sustainability:

- Increased system safety due to the avoidance of electrostatic charges
- Reduced roller consumption

Flexible Packaging

Boost your Production

Properties

- Hardness 75 ShA
- Color brown-beige
- High abrasion resistance
- High cut resistance and reduced tearing of cuts
- Electrically conductive
- Ozone resistant

Note

- BöttcherTec - PC series
- Hardness variants on request
- Profiling with grooves and cross-groove profiles according to drawings or measurements

Flexible Packaging
