Plastic film

Compound Shore A

739 70

Extrusion, winding, processing

Application

Take-off roller for blown film extrusion
Contact roller film winder
PVC embossing counter roller

Customer value

Productivity:

- Reduced number of roll changes due to very good resistance to split products in PVC extrusion
- Reduced number of roll changes due to high aging and temperature resistance
- Reduced production stops through improved material release due to reduced static charges

Quality:

- Constant product quality through constant flatness over the entire life cycle
- Avoidance of electrostatic charges in the film wrap due to antistatic properties

Sustainability:

- Increased system safety due to the avoidance of electrostatic charges
- Reduced roller consumption

Label

Boost your Production

Properties

- Hardness 70 ShA
- Color: Black
- High temperature resistance up to 140°C
- Electrically conductive
- Ozone resistant

Note

- BöttcherTec EC series
- Hardness variants on request
- Profiling with grooves and cross-groove profiles according to drawings or measurements
