

Boost your Production

Laminating

Compound Shore A

748 80

Format, transfer and counter-pressure rollers

Solvent-free (SF) and solvent-based (SB) lamination

Application

Format roller in 5 roller applicators of the SF lamination

Counter-pressure rollers in SF and SB lamination applicator units

Applicator rollers in SB lamination applicator units

Customer values

Productivity:

- Reduced production stops through improved material release due to reduced static charges
- Reduced storage costs through universal use of the same roller/sleeve types in different positions
- Reduced roller changing effort due to extended service life due to very good resistance to common solvents

Quality:

- Constant coating and laminating results thanks to stable process conditions due to very good resistance to common solvents
- Constant coating and laminating results through improved material release due to the avoidance of electrostatic charges

Sustainability:

- Increased system safety due to the avoidance of electrostatic charges
- Reduced roller/sleeve requirements

Label

Boost your Production

Properties

- Hardness 80 ShA
- Color: Black
- Electrically conductive
- High resistance to typical solvents and cleaning agents for LF and LH lamination
- Ozone resistant

Note

- BöttcherTec EC series
- Hardness variants on request
- Available as roller and sleeve covering
- Variable cut back
