BöttcherPro Cleanfix-UV

UV Printing Roller Cleaning Gel

APPLICATION

Printing Machines	UV printing
Inks	Dissolves UV inks
Process	Manual Cleaning

ADDED VALUE

Productivity:

- Easy application, convenient to use with the bottle.
- Extends the lifespan of rollers.
- Regular use (once a week) prevents calcium buildup on ink rollers.

Quality:

- Effective cleaning, also for calcium deposits and paper coating residues.
- Restores the original roughness and ink acceptance of the rollers.

FEATURES

- Based on solvents, acids, and auxiliary agents
- Suitable for ink rollers used in UV printing (EPDM)
- Can also be used for changeable and conventional materials

TECHNICAL DATA

Form:	Liquid
Color:	Colorless
Flash Point:	100°C
Density:	1.06 g/cm³ at 20°C
Water Solubility:	Miscible

Metal Decorating

PACKAGING

0.5 kg plastic bottle, carton of 6 bottles.

NOTES

After washing with a Böttcher UV wash: Simply apply BöttcherPro Cleanfix-UV with the bottle and let it act on the rollers for 3-5 minutes at slow idle speed until the dissolving process is complete.

Then, clean the rollers with water and/or UV wash. Suitable for both hand washing and use in automatic washing systems. For particularly stubborn contamination, the soaking time can be extended, even overnight.
