

Boost your Production

BöttcherPro Cleanfix

Cleaning Paste in a Tube

APPLICATION

Printing Machines: Suitable for all types of offset printing machines

Inks Suitable for conventional inks

Process Manual cleaning

ADDED VALUE

Productivity:

- Prevents roller glazing with regular use, ensuring the performance of the ink rollers.
- Reduces cleaning effort in the ink units during critical color changes.
- Easy application with the convenient tube format.

Quality:

- Prevents color deviations by deeply cleaning the roller surface from old, dried ink residues.

Sustainability:

- Label-free and free from critical ingredients.
- Meets the criteria of various eco-labels for printed products (Blue Angel, Nordic Ecolabel, EU Ecolabel, and Austrian Ecolabel UZ24).

FEATURES

- Based on solvents, surfactants, and auxiliary agents
- Suitable for ink rollers used with conventional printing inks (including changeable printing)
- Removes residues of conventional printing inks

Metal Decorating

TECHNICAL DATA

Form:	Paste
Color:	Beige
Flash Point:	Not measurable
Density:	1.14 g/cm³ at 20°C
Water Solubility:	Partially miscible

PACKAGING

0.5 kg Tube.

NOTES

After a brief pre-wash with a Böttcher roller wash, simply apply BöttcherPro Cleanfix using the tube onto the rollers and allow it to act for a few minutes at idle speed in the machine. Then, rewash with the same Böttcher roller wash. For stubborn contamination, allow BöttcherPro Cleanfix to act longer. It is recommended to perform this process once a week (in combination with BöttcherPro Calciumfix) as part of roller maintenance.
